Hi Peter

You can download the software and documentation from:

<http://neutrons.ornl.gov/diagnostics/documents/epics/Downloads/downloads.html>

You should first install EPICS Shared Memory Ver 3.14.7 followed by Beta 2 Install of SNS Template (labVIEW 7) .Please keep in mind this is distributed as beta software and that you use it at your own risk.This will install the CA Client as well as the EPICS Shared MemoryIOC.

Best regards, Willem Blokland

Dear Willem Blokland,
on May, 31 2007 you wrote a reply to an EPICS tech-talk mail concerning your LabVIEW Shared Memory Interface to EPICS IOC. There you offered to download the code in the case of interest.

In deed I would be interested to have a look at your code and maybe use it for our purposes.

Could you tell me please where I can download the code and, if available, some documentation?

Thank you in advance,
best regards,
Peter Zumbruch
